WEB 3.0 ENERGY ECOSYSTEM

Low cost EV charging
infrastructure with advanced
services

OUR MISSION

**Empower everyone's mobility through
smart, affordable, and eco-friendly
electricity !**

THE PROBLEM

-  **Insufficient** public charging infrastructure.
-  **Fragmented** charging networks lacking interoperability.
-  **Battery cost** is not decreasing as expected.
-  **Cost of destination charging** is too high.
-  **Mass charging at peak hours** weighs on the electric networks.

OUR SOLUTION

We create an open connected framework to manage EV charging and energy

- » Densifying the charging network -> smaller batteries possible
- » Hardware independent -> low cost simple plugs can be shared
- » Low operational costs (Web3.0) -> lower cost of destination charging
- » E2E control of the charging session -> smart charging functionalities
- » Decentralized marketplace -> high scalability

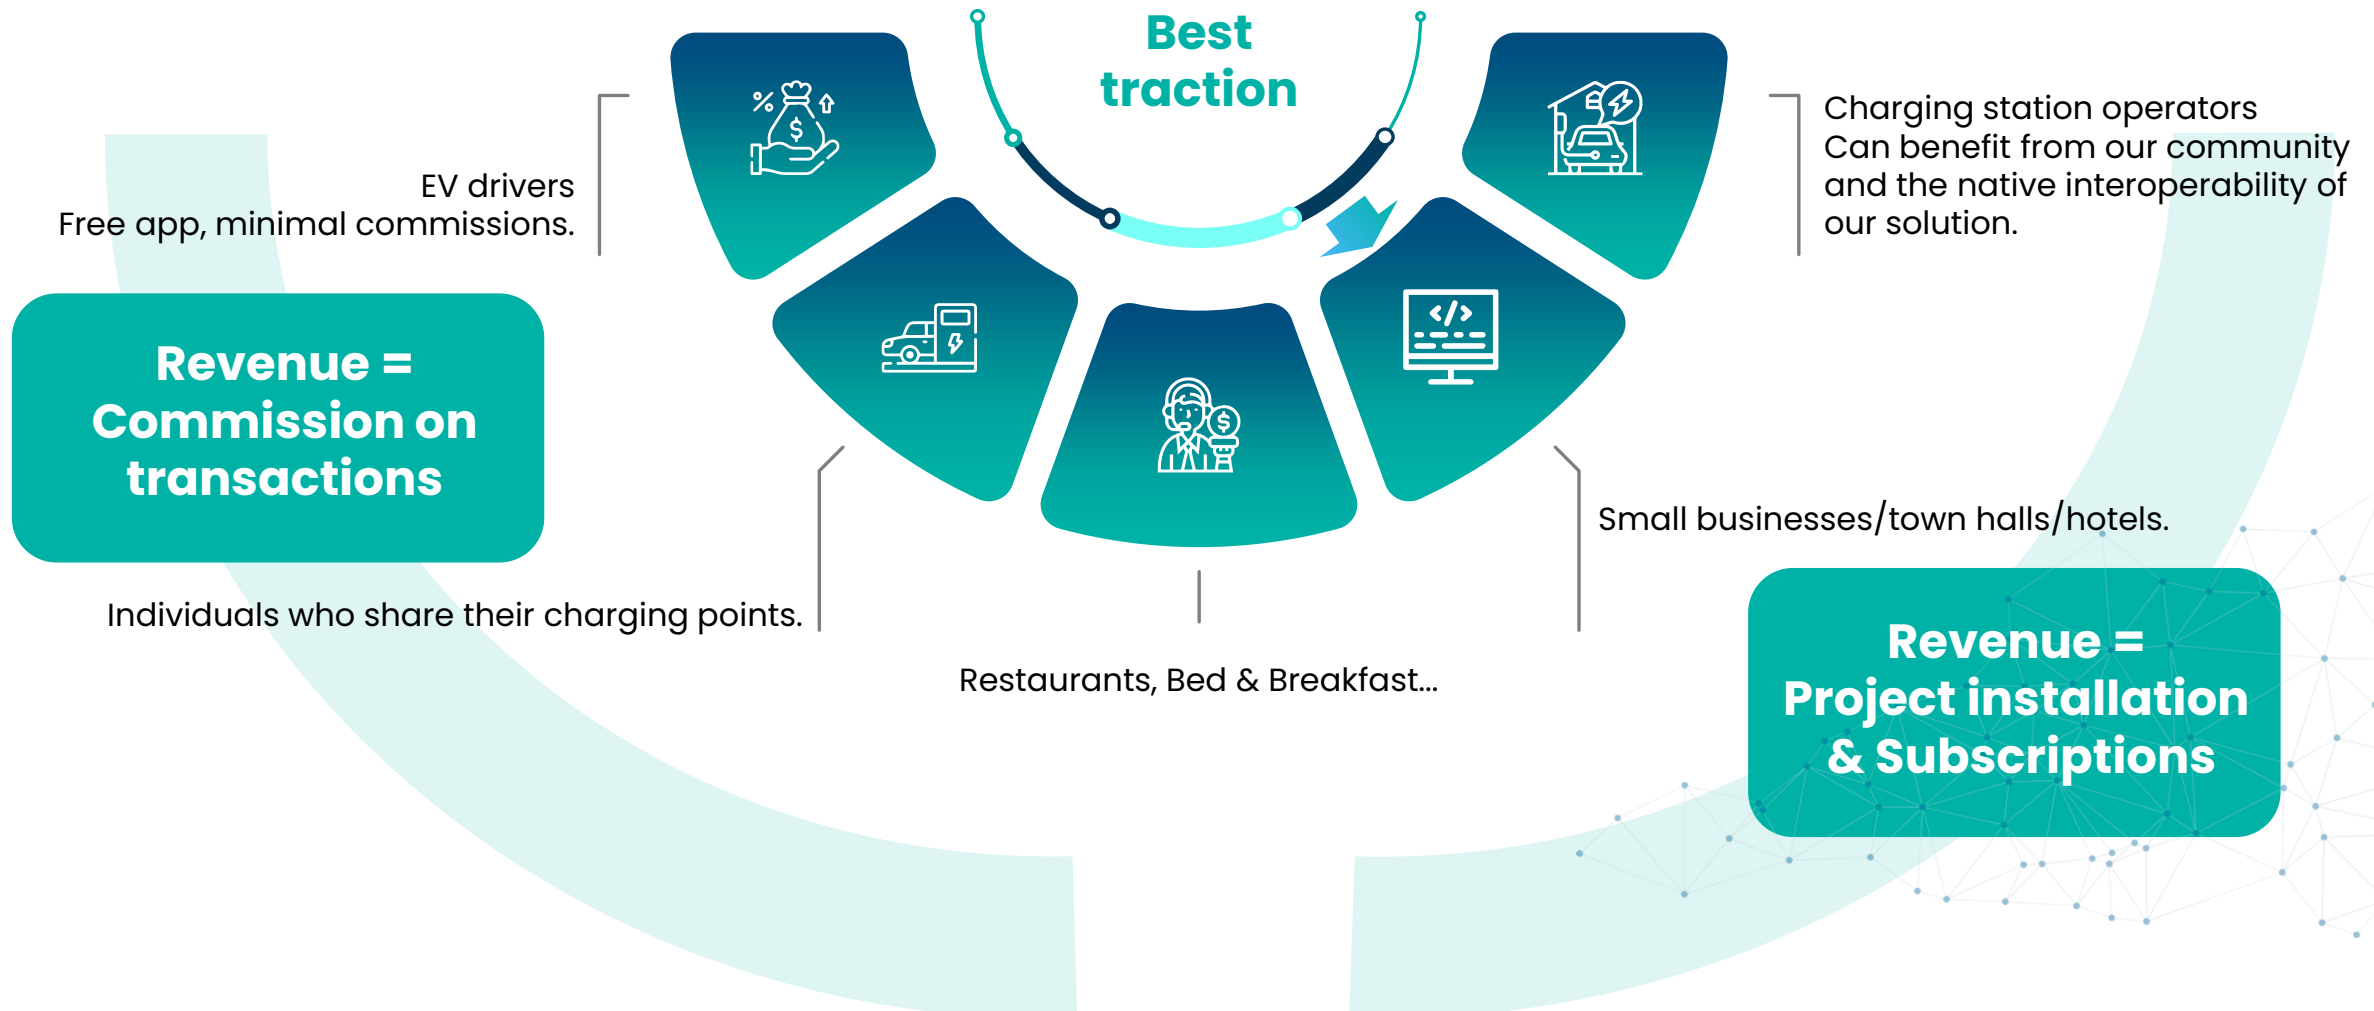

EV charging App

Decentralized Energy Management System

OUR CUSTOMERS

EV CHARGING MARKET

Public charging points
market: >35% annual growth
towards 2027

+ Aggressive
mandated growth
forecasts to 2030

Home and workplace
charging points: x10
potential

New value fields:
Smart Charging, V2G

Cumulative global installed charging infrastructure

Home & Work

Public

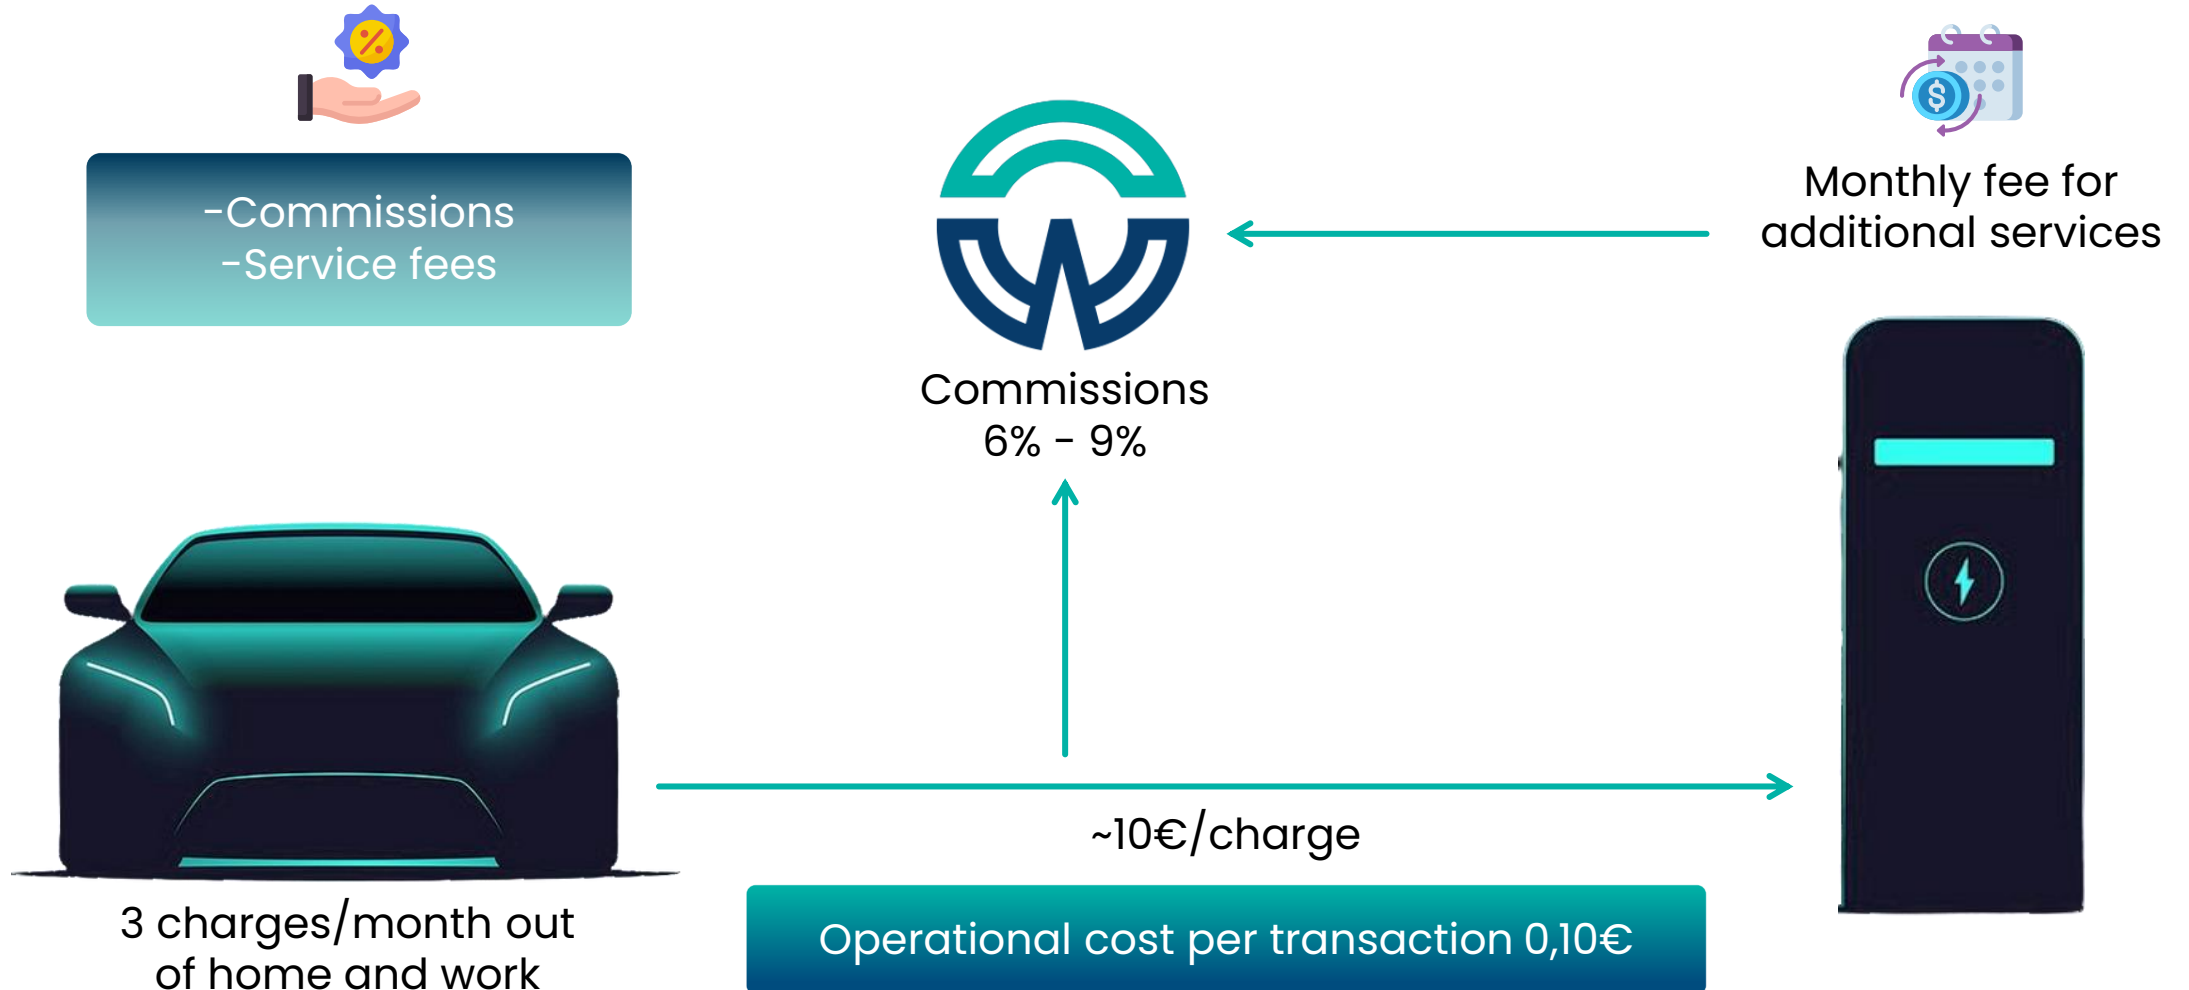

Millions of connectors – Source: BNEF

Commission fees on charging sessions

	2022	2025	2030
TAM	\$1.02B	\$3.9B	\$10.8B
SAM	\$0.34B Europe	\$2.92B Europe + NA	\$10.8B World

VALUE FLOW

SOME COMPETITORS

Blockchain payment for EV fast charging using Ethereum (CO2 issue)

Services for finding and booking public and private charging stations

Share EV Charging Infrastructure with other EV Users (no simple payment).

Some others

None of these competitors leverages a full Web3.0 ecosystem.

COMPETITIVE ADVANTAGES

EV massification ready !!

MARKET OPPORTUNITY

LOW COST CHARGING INFRASTRUCTURE

**Vehicle + battery
price acceptability**

TCO based comparison with current ICE market

HISTORY & ROADMAP

GO TO MARKET STEPS

B2B EV charging
massification solution

Crypto payment
gateway for EV charging

P2P EV charging
marketplace

- Dec 2024** ● 1000 charging stations operated
- Jun 2024** ● App compatible with 100k charging stations in Europe
- Dec 2023** ● eMobility Service Provider certified by Girève interoperability platform
- Nov 2023** ● Plastic Omnium Innovation Grand Prix
- Jan 2023** ● Paris&Co Quartiers d'Innovation winner
- Oct 2022** ● European Project NGI Ontochain winner
- Aug 2022** ● Werecoin ranking in Top #2000 cryptos
- Oct 2021** ● MVP launched

THE TEAM

Benoît MAÏSSEU* – CEO
Electric Vehicles – Radiocom
EADS, Renault Nissan
Supélec – Economy Sorbonne

Nadiya KHOKHRYAKOVA* – President
Entrepreneur
BBA Kharkov
PhD Geopolitics Sorbonne

François CHIRON* – CTO
IT & Payment
Société Générale, UVW
Polytechnique – Supélec

*Co-Founders

ANNEXES

OUR PRODUCT

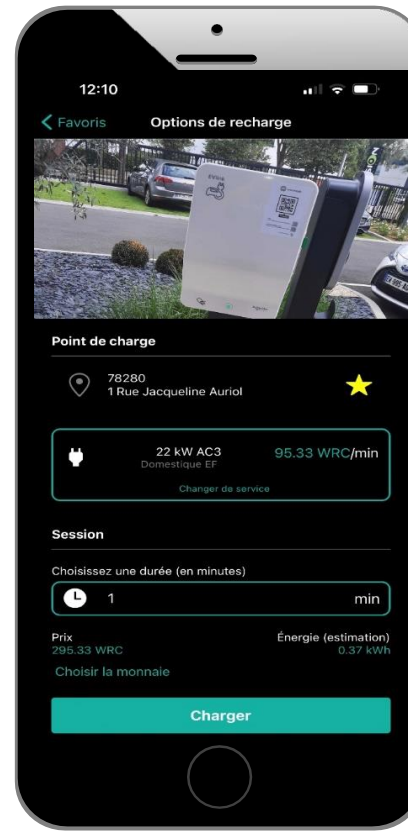

We have developed the key components which are currently working on a pilot scale:

Tezos & EVM Smart Contracts architecture & DApp

IoT and OCPP servers

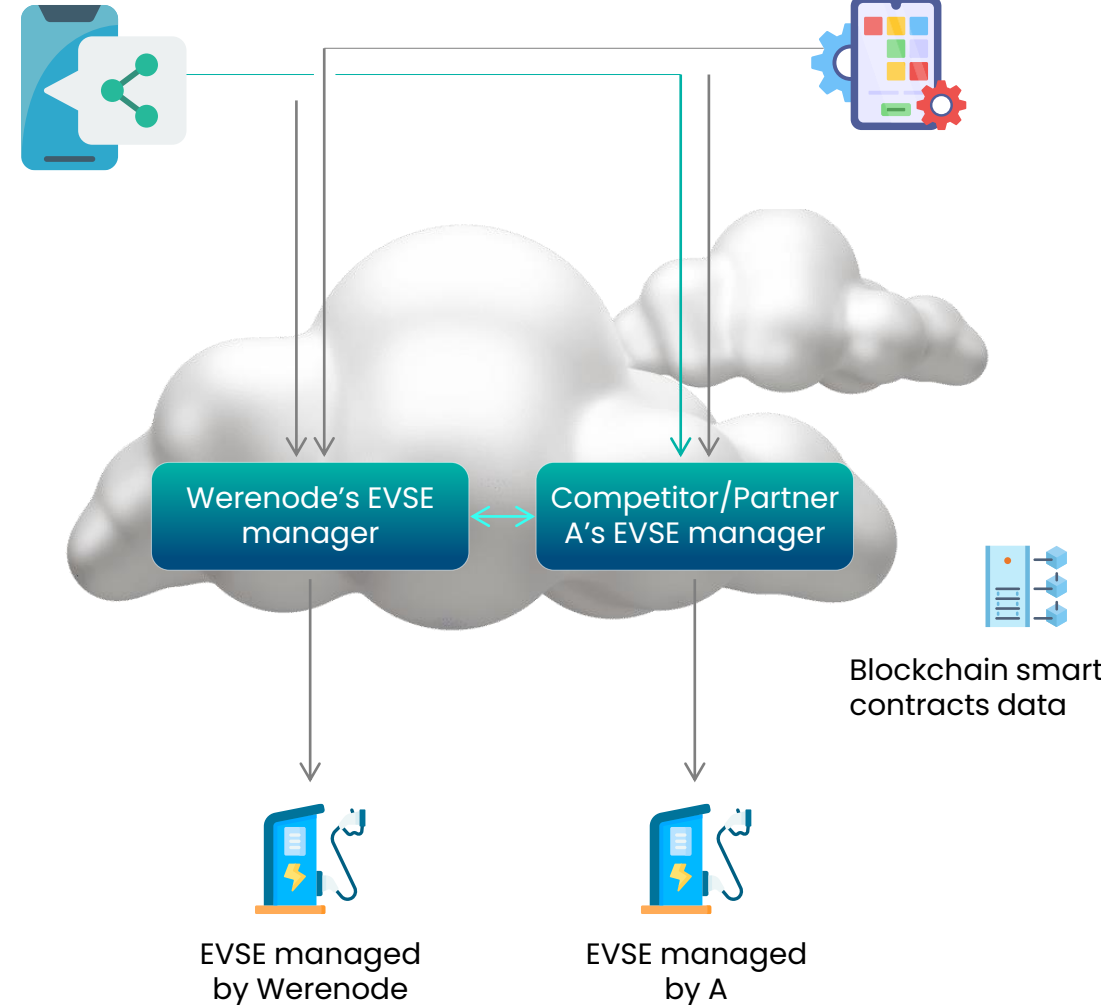

AI algorithms for smart charging

Full end-to-end control of the charging session

Same shared App

Or another App

SMART CHARGING

Several features:

- » Price optimization
- » Power balancing
- » Network services (frequency balancing, peak shaving)
- » Eco-branding

Charging stations or
simple connected plugs

Innovative HMI to increase
acceptability for the user.

Charge
request

Example of price optimization:

Control of terminals in real
time to charge at the
cheapest times while
respecting the customer
request (per new HMI
approach)

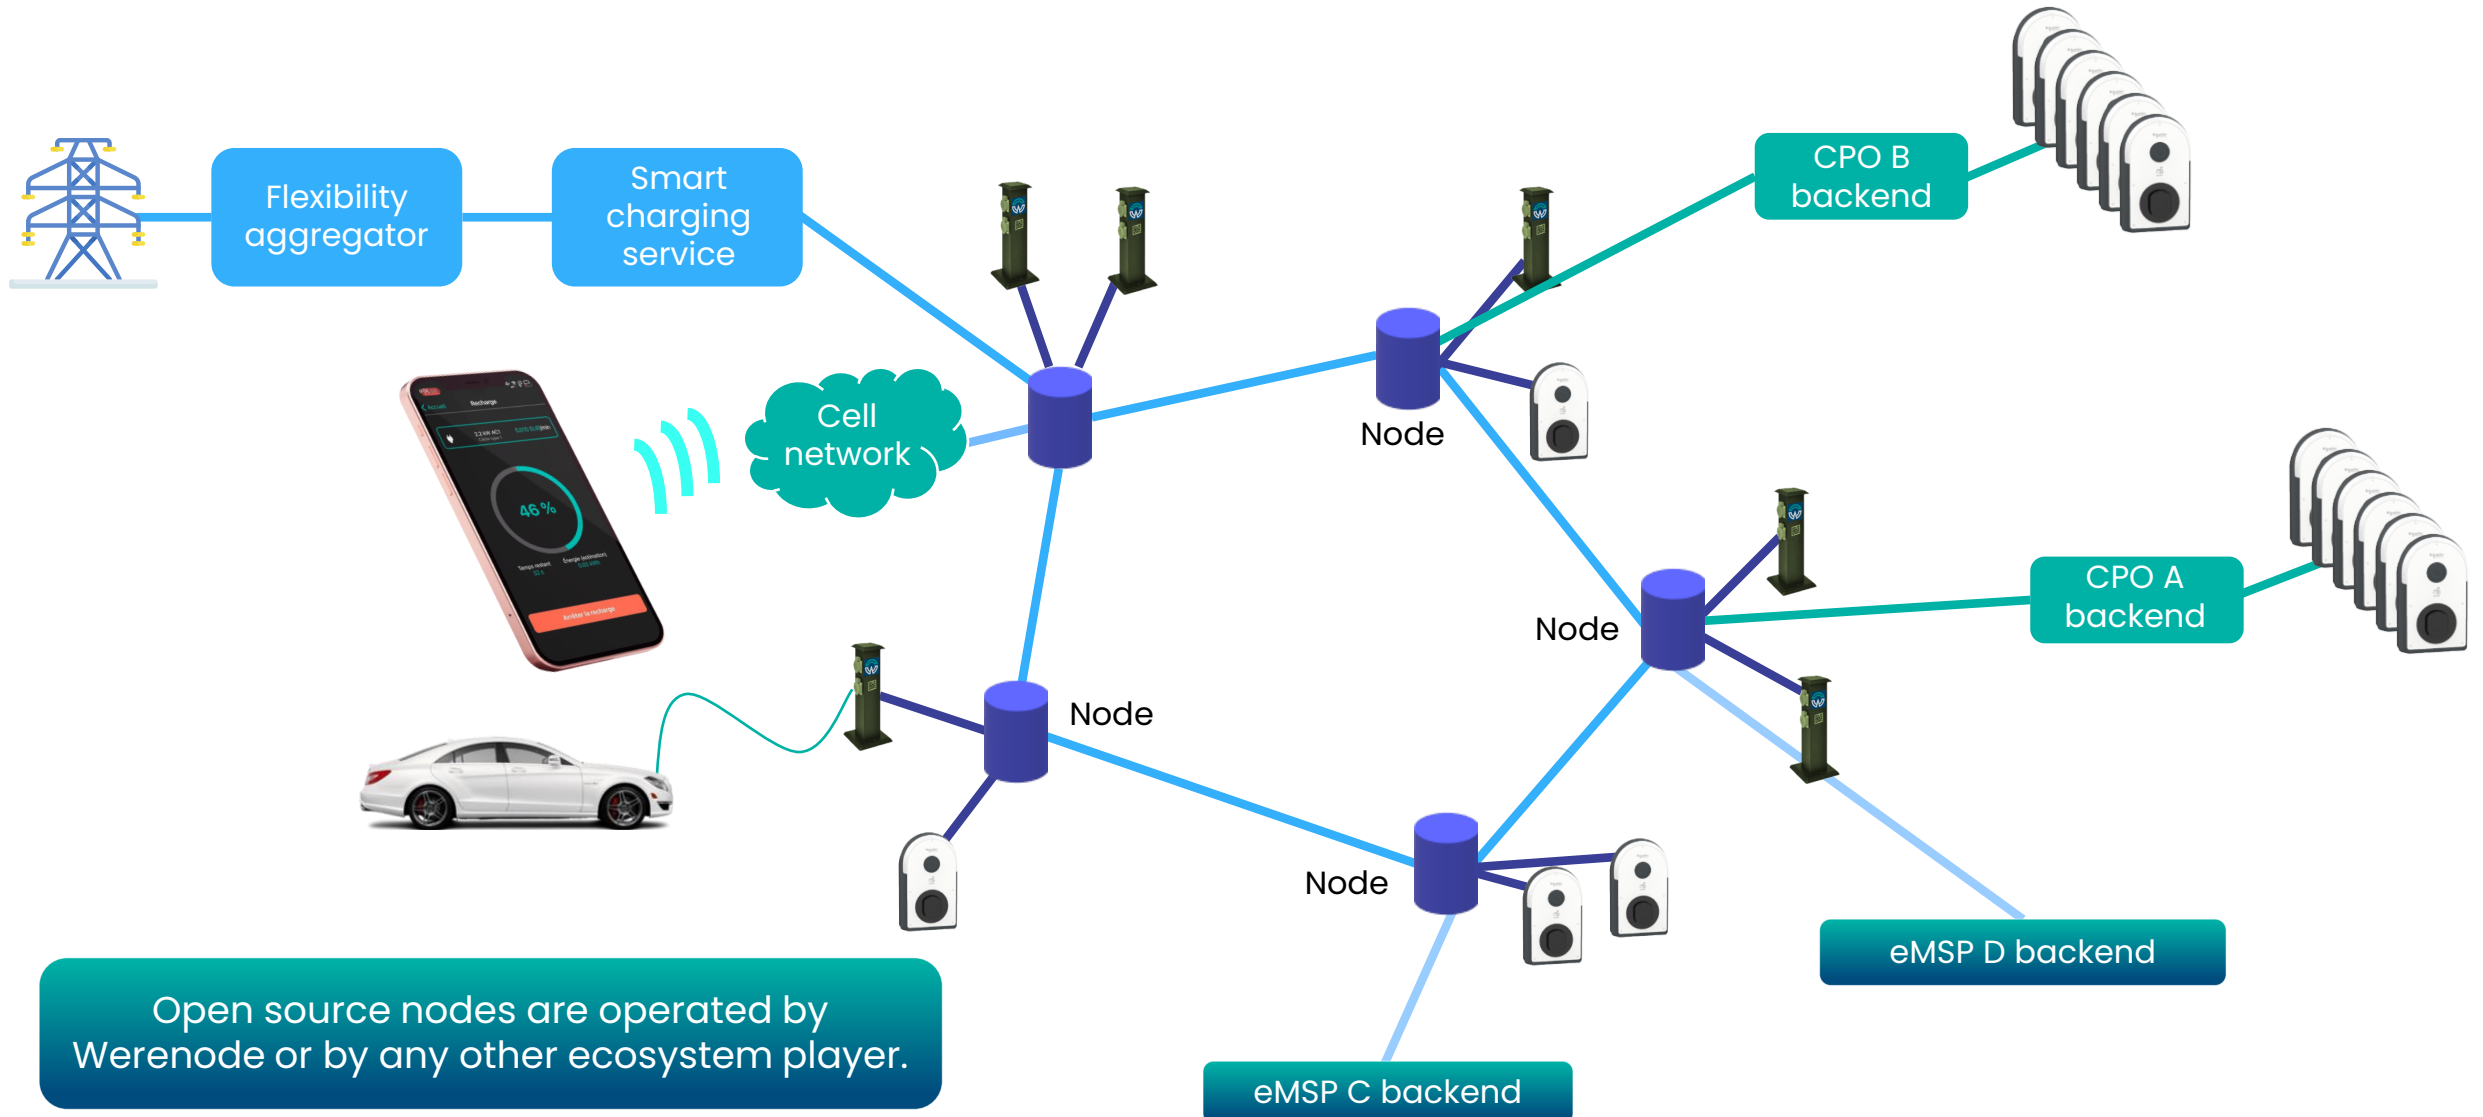

Smart Charging
algorithm

Werenode's server

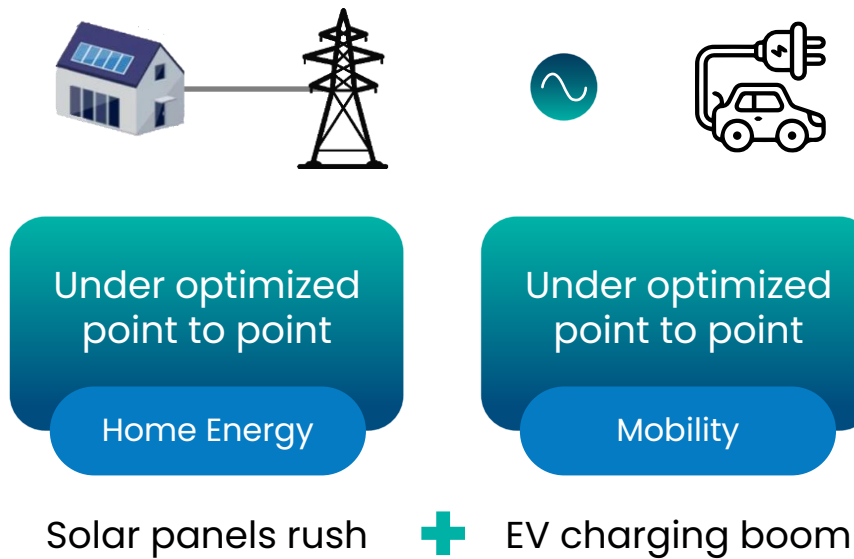

Elasticity by algorithm rather than by sacrificing the user service.

OUR ECOSYSTEM AT A GLANCE

A SMART ENERGY BOX IN EACH HOME

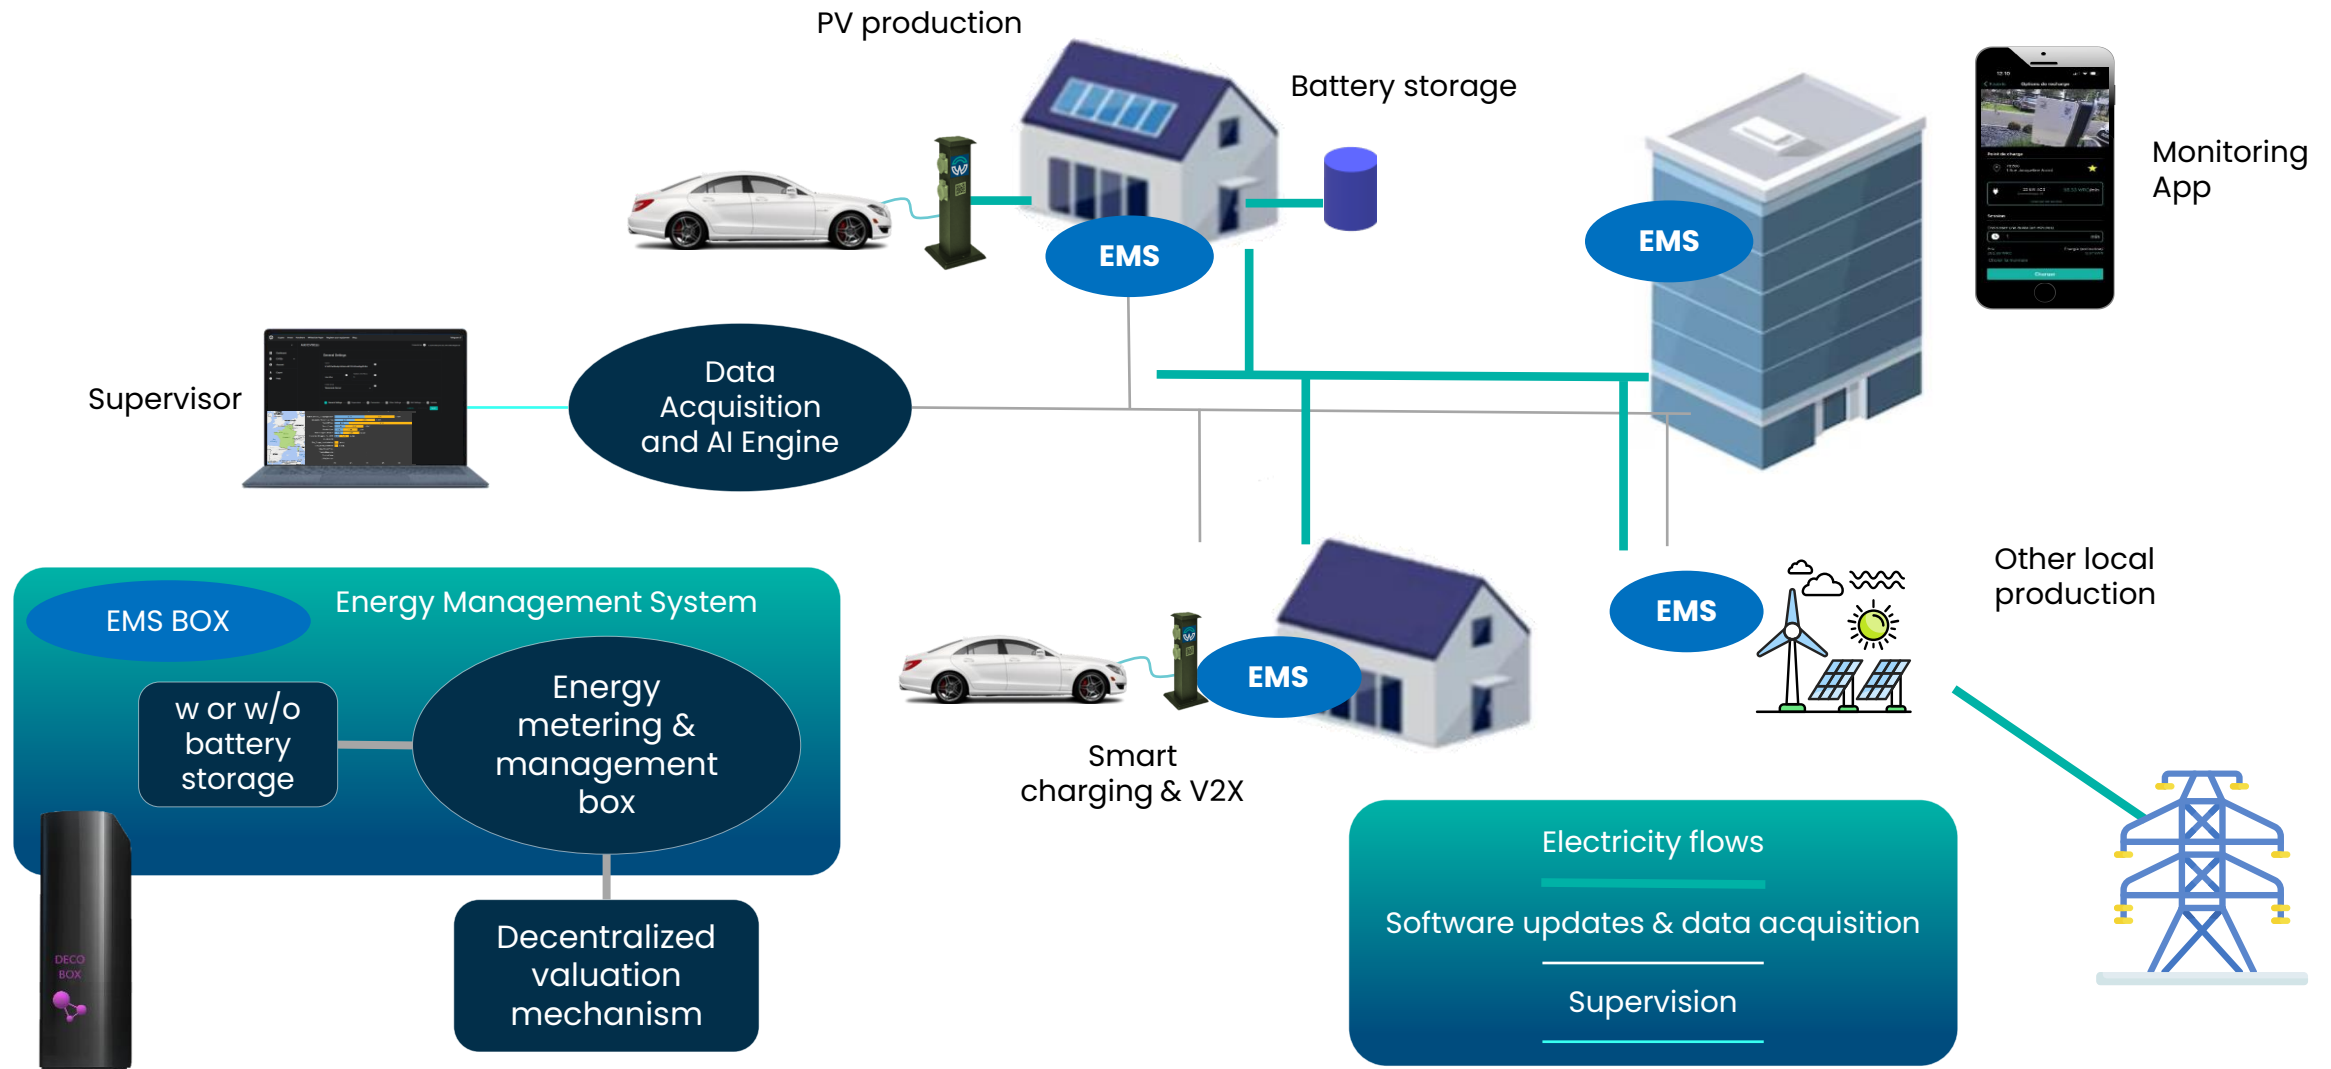

From under optimized point to point algorithms

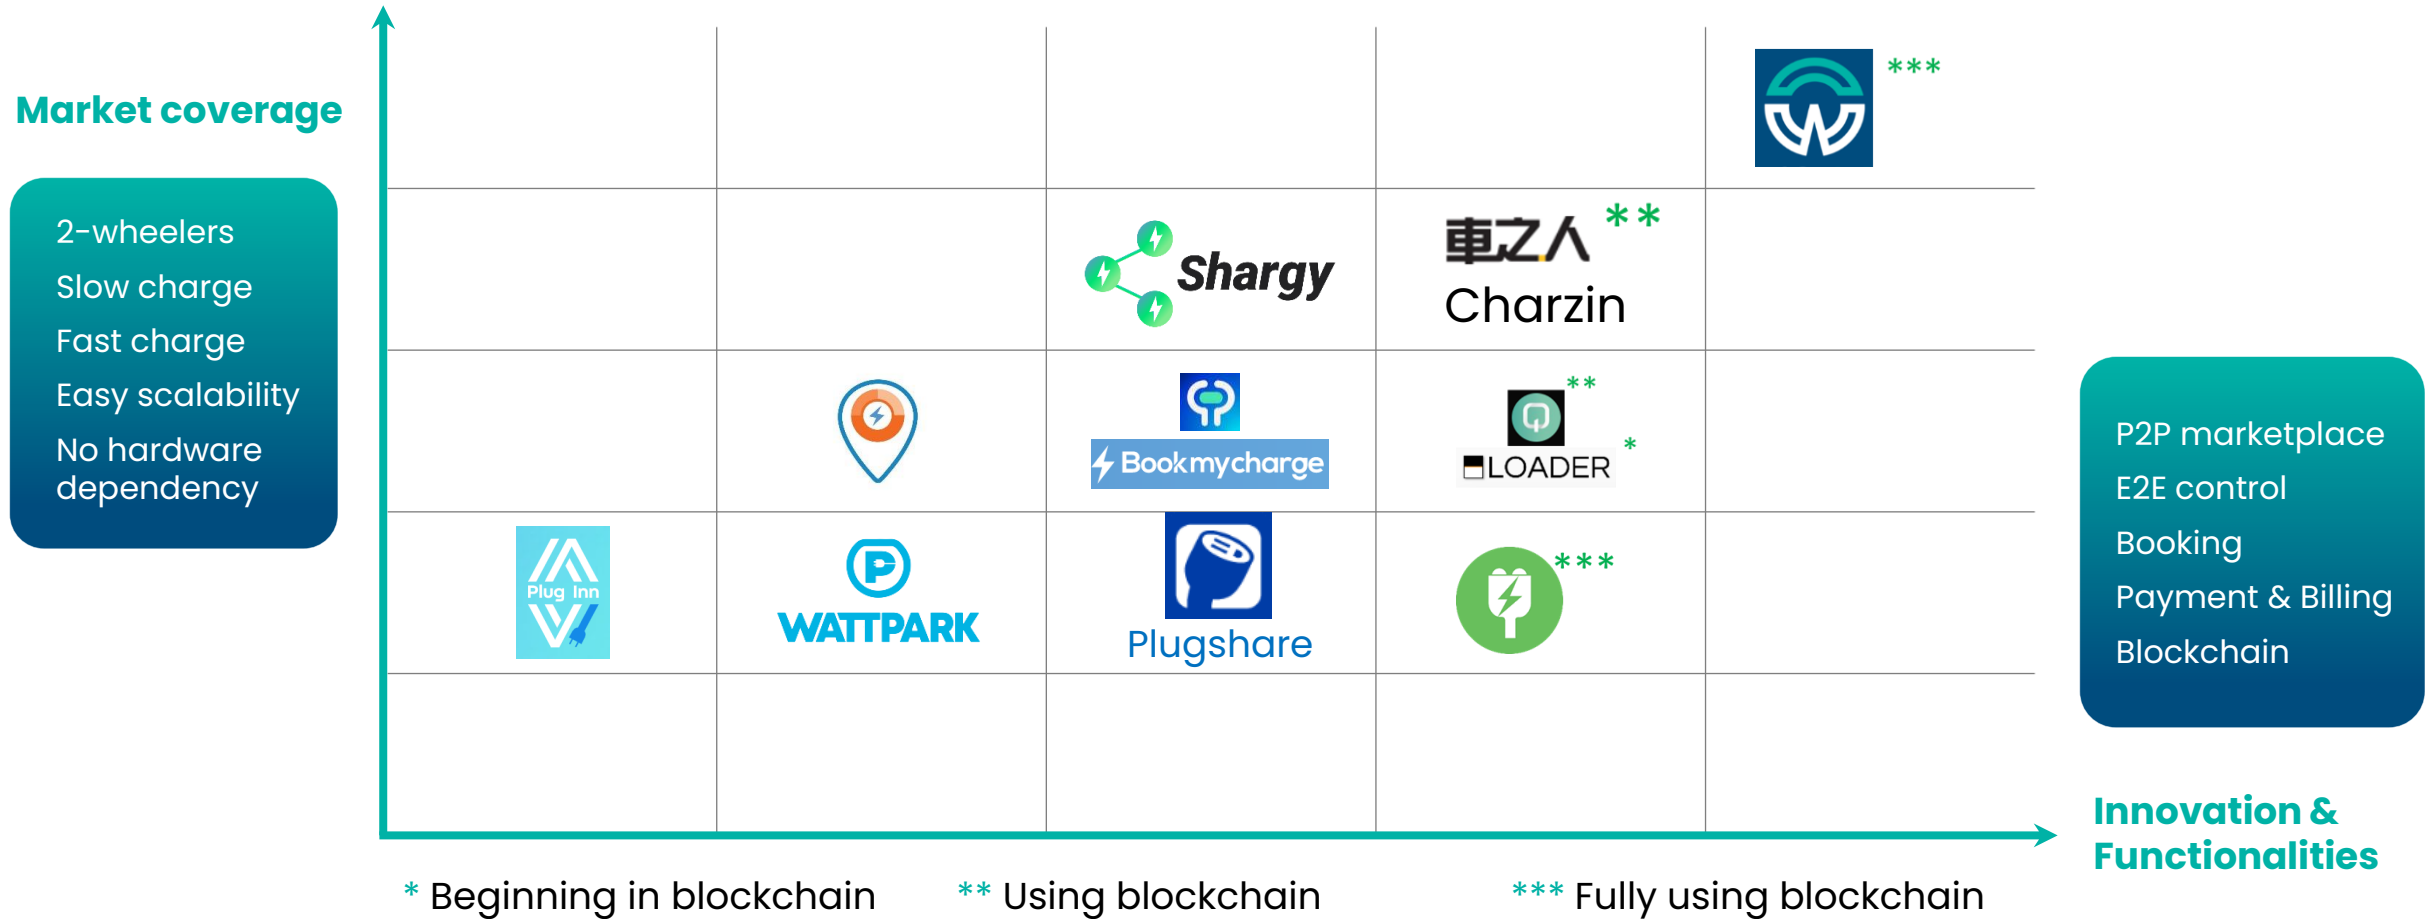

To smart & decentralized energy communities with electricity transfers

DECENTRALIZED ENERGY SYSTEM

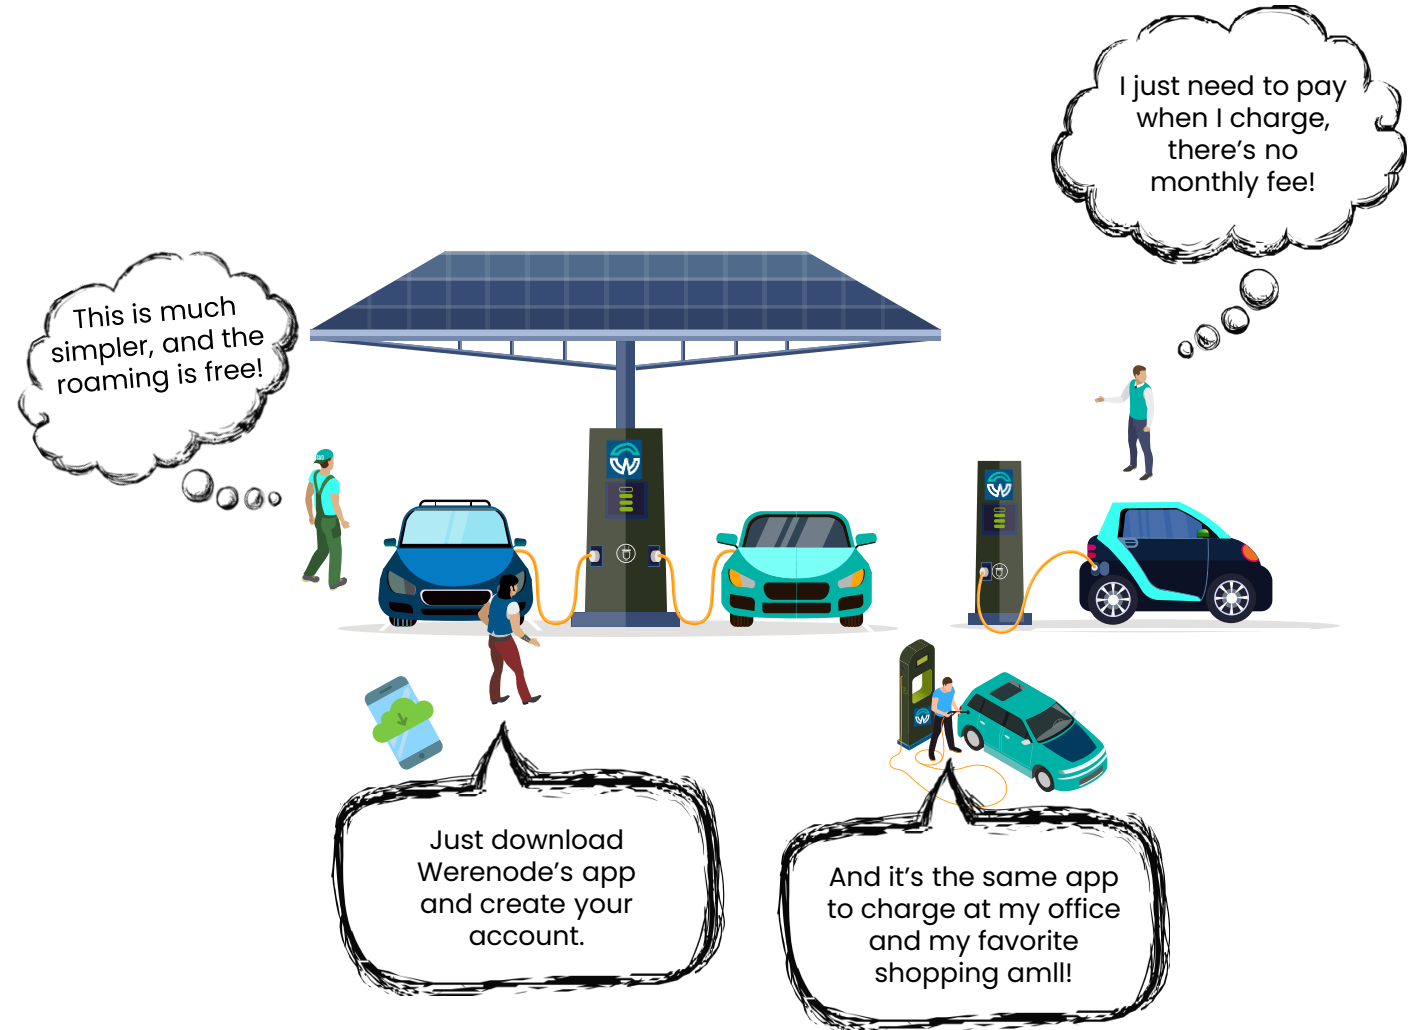

COMPETITORS MAP

WHY BLOCKCHAIN FOR EV CHARGING?

A blockchain technically meets all these key requirements:

- » It is a secure database
- » The blockchain data are public
- » It allows the issuance of large numbers of secure digital certificates
- » It is an open and decentralized tool
- » It allows native roaming between ecosystem partners.

FINANCIALS & FUND RAISING

	2024	2025	2026	2027	2028
